

Madison Fielding's Flagstone is the worlds best outdoor residential speaker. The sound is full and balanced, even at low listening levels. The lower portion holds the front firing tweeter, mid-range, crossover and down-firing woofer. The upper portion holds live or artificial plants, for which drainage is provided. All speaker components are concealed from view. The Flagstone is fully weatherized and comes with a removable tray for use with live or artificial plants. The enclosures are made in the US from industrial grade poly resin. The Flagstones are available in standard Flagstone gray and weathered black. They are available in custom configurations or as planters only. Ask for other colors.

The Mini Flagstone PlanterSpeaker

The Mini Flagstone features a custom front firing speaker system with a 1" soft fabric dome tweeter and a 4" mid-range plus a down firing 8" dual voice coil woofer for great bass. This speaker delivers a wide, full range HiFi sound. A pair of Mini Flagstones can cover an area of up to 800 square feet.
