

New for 2014, the Madison Fielding Charleston and New Orleans corner PlanterSpeakers. These lattice work planter speakers are perfect for patios and decks where space is limited. Made from renewable cypress and handcrafted in the United States, our wood speakers show that you can design and build great products while conserving our natural resources. In addition to the environmental benefits, the use of real wood benefits the sound of the speaker.

The Charleston PlanterSpeaker

The Charleston two way speaker system includes (2) 1" tweeterS and (2) 5" HD wooferS. There is a down firing 8" passive radiator to reinforce bass response. The Charleston can be connected in either mono or stereo and will cover an area of up to 500 square feet .
